## **COVID-19 RESPONSE: UPDATE #5**

LNG Canada and JGC Fluor continue to implement important measures to help reduce the spread of the COVID-19 virus. As outlined in our previous [COVID-19 Response updates](#), we're taking firm and prudent actions to promote the safety and well-being of our project's workforce and the communities in which we live and operate.

Questions and comments related to the LNG Canada Project and our COVID-19 response can be sent to [info@ifjvkitimat.com](mailto:info@ifjvkitimat.com) or JFJV's community feedback line at 250-632-JFJV (5358).

### **UPDATED COVID-19 MEASURES TAKEN**

- Participated in the District of Kitimat Council Meeting (March 30) and provided updates on the project's COVID-19 risk mitigation plan and action. The project reports as a member of the District of Kitimat-led COVID-19 emergency response committee.
- Reduced commuter travel by ~90%, with the number of fly-in/fly-out transit reduced from ~1000 per week to ~50 per week. The site is focused to maximize a local workforce.
- Extended work rotation schedules at site; contributing to the drastic reduction of fly-in workers.
- Enhanced health check points for workers include:
  - All workers are required to complete a COVID-19 self-assessment before they leave home.
  - Health checks are required prior to boarding charter flights, based on guidance from the Public Health Agency of Canada.
  - Temperature checks and complete health screenings are required upon arrival and departure at lodges.
  - Any worker who feels unwell or shows symptoms, are required to self-isolate. They are then assessed and monitored by the site medical support provider.
- Enhanced internal communications and advisories on reducing worker-community interaction to further minimize risks associated with the spread of COVID-19.
- Reduced site operations to essential work, with enhanced safety precautions that respect the recommended physical distancing protocols. Essential work includes:
  - Environmentally sensitive work that can only be completed during limited seasonal windows
  - Work scopes that are a regulatory requirement
  - Schedule-sensitive activities
  - Offloading of equipment and materials already on its way to Kitimat

- Continue to have daily engagement with Northern Health on project preventative measures and worker health screenings.

Our approach remains aligned with the Government of Canada and Government of B.C. notices for construction sites. We continue to monitor the situation and will adjust our plans and actions as required.

Continue to stay safe.
