COVID-19 RESPONSE: UPDATE #6

LNG Canada and JGC Fluor (JFJV) continue to implement important measures to help reduce the spread of the COVID-19 virus. As outlined in our previous [COVID-19 Response updates](#), we're taking firm and prudent actions to promote the safety and well-being of our project's workforce and the communities in which we live and operate.

Questions and comments related to the LNG Canada Project and our COVID-19 response can be sent to info@jfvkitimat.com or JFJV's community feedback line at 250-632-JFJV (5358).

UPDATED COVID-19 MEASURES TAKEN

- Continue to post regular COVID-19 response updates to the LNG Canada and JFJV websites, including two new info infographics:
 1. [10 measures to reduce COVID-19 risks to the community and workforce](#)
 2. [10 steps to reducing the COVID-19 risks associated with commuter travel](#)
- LNG Canada and JFJV are closely following Transport Canada guidelines for materials shipping and delivery, and adhere to the federal government's directives, to ensure crews and shipments travelling to and from our project site do not put communities and workers at risk.
- Provided information to the community and answered questions about the project's COVID-19 risk mitigation plan and implementation at a well-attended Kitimat Chamber of Commerce virtual town hall on April 6. It can be watched on the Chamber's [Facebook page](#).

Our team members at site continue to progress essential activities while demonstrating their commitment to safety and environmental protection. We are proud to announce that the LNG Canada Project reached Goal Zero on site in March: zero harm to people, zero harm to the environment, and zero leaks. This was not an easy achievement given the varying levels of COVID-19-related effects at site and in people's work and personal lives. We commend their resilience, patience, flexibility and care for each other.

Our approach remains aligned with the Government of Canada and Government of B.C. notices for construction sites. We continue to monitor the situation and will adjust our plans and actions as required.

Stay safe.

Vince Kenny
LNG Canada Construction Manager

Berni Molz
JGC Fluor Construction Director
