COVID-19 RESPONSE: UPDATE #9

LNG Canada and JGC Fluor (JFJV) continue to implement important measures to help reduce the spread of the COVID-19 virus. As outlined in our previous [COVID-19 Response updates](#), we're taking firm and prudent actions to promote the safety and well-being of our project's workforce and the communities in which we live and operate.

Questions and comments related to the LNG Canada Project and our COVID-19 response can be sent to info@jfvkitimat.com or JFJV's community feedback line at 250-632-JFJV (5358).

UPDATED COVID-19 MEASURES TAKEN

- To further enhance onsite hygiene practices, all project vehicles and equipment have been stocked with sanitation wipes. Workers are required to clean all touchpoints before and after operation.
- LNG Canada and JFJV have extended our two people per project vehicle limit to **all vehicles entering the site's temporary parking lot**.
 - All vehicles shall have a maximum of two persons: the driver and one passenger in the rear passenger side.
- BC's Provincial Health Officer recently issued additional measures in an [Order](#) to persons who employ workers in the Agricultural, Aquaculture, Forestry and Resource Sectors and/or who provide accommodation for them in an industrial camp. LNG Canada is working with the lodge providers and contractors to make sure that they are aware of this Order and the requirements contained within. The project continues to implement any new recommendations that may be issued by the authority.

It has been over six weeks since we first stood up the unified Incident Management Team to fight the risks of COVID-19 transmission and we expect the mitigation measures implemented to date will be in place for the foreseeable future.

As always, our approach remains aligned with direction from the Government of Canada and Government of British Columbia. We continue to monitor the situation and adjust our plans and actions as required.

Stay safe.

Vince Kenny
LNG Canada Construction Manager

Berni Molz
JGC Fluor Construction Director
