## **COVID-19 RESPONSE: UPDATE #10**

LNG Canada and JGC Fluor (JFJV) continue to implement important measures to help reduce the spread of the COVID-19 virus. As outlined in our previous [COVID-19 Response updates](#), we're taking firm and prudent actions to promote the safety and well-being of our project's workforce and the communities in which we live and operate.

Questions and comments related to the LNG Canada Project and our COVID-19 response can be sent to [info@ifjvkitimat.com](mailto:info@ifjvkitimat.com) or JFJV's community feedback line at 250-632-JFJV (5358).

### **UPDATED COVID-19 MEASURES TAKEN**

- On May 5, 2020, the provincial government announced its [BC Restart Plan](#).
  - LNG Canada and JGC Fluor will continue to take direction from the Province and public health officials as their plans unfold, and we anticipate a methodical, carefully managed return to regular workplace activities. Our priority is to continue to ensure the health, safety and well-being of our workers and the community while cautiously returning to work.
- Given BC Restart Plan, we expect the measures and procedures we have put in place will remain in place for the foreseeable future (see attached document – [COVID-19 Measures Implemented to Date](#)).
- Social distancing protocol on project buses further enhanced.
  - **Bus driver first off/last on:** The bus driver disembarks the bus prior to passengers loading at pick-up and before passengers exit at drop-off. Physical distancing is maintained while loading and unloading takes place.
  - **Bus boarding – back to front:** When boarding buses, passengers must fill in the seats from the back to the front, starting from the last row, and only sit in designated seats, as per the “checkerboard” sitting arrangement. All other safety procedures and etiquette still apply.

As always, we will continue to monitor the situation and adjust our plans and actions as required.

Stay safe.

Vince Kenny  
LNG Canada Construction Manager
