

JGC Fluor (JFJV) FACT SHEET

Contracting and Procurement

Creating Business Opportunities

JGC Fluor BC LNG JV (JFJV), is the engineering, procurement, and construction (EPC) contractor for the LNG Canada Project. Located in Kitimat, British Columbia, construction of the project began in December 2018 and has created significant opportunities for small, medium, and large businesses.

Our goal is to find the best suppliers and contractors available and provide as many benefits as possible to the local and First Nations businesses.

A Project Everyone Can Be Proud Of

LNG Canada has committed to making this the **Safest Project on Earth**. JFJV shares that vision, and every contractor and supplier on the project will as well.

Another point of pride is our commitment to local and First Nation engagement, while still creating an even playing field for all companies. We are committed to creating opportunities for businesses of all sizes and our procurement process is open and transparent.

Opportunities for Local and First Nations Businesses

JFJV uses the information provided during the registration process to understand the goods and/or services companies are offering. Companies are then included in the contracting and procurement registry to be contacted when suitable opportunities are identified by JFJV or one of its subcontractors.

As we continue to move forward on the LNG Canada Project, JFJV will finalize its remaining direct contracts and focus on supporting locals and First Nations with indirect subcontracting opportunities.

Simultaneously, there will be more contracting and procurement opportunities for local and First Nation businesses directly with LNG Canada.

Register with Us

Businesses interested in contracting and procurement opportunities must first register online. To do so, visit jfjvkitimat.com/contracts-and-procurement/ and follow the instructions. A list of registered businesses can also be found [here](#).

Register with LNG Canada

Businesses interested in contracting and procurement opportunities directly with LNG Canada should visit LNG Canada's website.
